

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims**

Claims 1-21 (canceled).

Claim 22 (currently amended) A chromatographic process wherein a conjugate ~~according to claim 1~~ is used as stationary phase, the conjugate comprising a support material linked to oligomers or polymers of a saccharide, which linking is via urea linkages between the saccharide moieties and the support material, and wherein the oligomers or polymers are also cross-linked via urea linkages.

Claim 23 (original) A process according to claim 22, wherein the conjugate is used as a chiral stationary phase in enantiomeric separation or enantiomeric analysis.

Claim 24 (original) A process according to claim 22, wherein a liquid mobile phase is used that contains 95% or more of water.
